

## Grace Studio Amenities & Equipment

Welcome to Grace Studio, a podcasting and videocasting space available, free of charge, to members of Grace Presbytery and our community partners. To ensure this resource remains in top shape for everyone, please return all equipment to its labeled spot after your session and report any damaged or missing items upon checkout so we can repair or replace them for the next user.

### Studio Amenities

---

Grace Studio offers a meticulously treated recording environment designed by a professional sound engineer to ensure broadcast-quality audio. The space features comprehensive atmospheric conditioning, including high-density acoustic felt installation, specialized foam panels, and 3D city-trap sound diffusers that manage reflections and standing waves. To maintain a pristine noise floor, the studio is equipped with noise-reducing curtains over the entryways, sound buffers installed under the doors, and a thick rug to further muffle ambient sound and floor vibrations. Silent LED lighting is used throughout to eliminate electrical hum, ensuring a crystal-clear recording. Guests can work comfortably at a dedicated desk with ergonomic seating, utilizing a full suite of professional-grade recording equipment or a variety of adapters and accessories to easily connect their own devices to the studio's production setup.

### Studio Equipment

---

#### Audio Equipment
